

Assalamualaikum wr. wb.

Right now we all gather here to review and feedback

'GEMAR' (Games Permulaan Membaca Tunarungu) design application

Next we're going to show designs from GEMAR

I cant wait to see it

Let's introduce yourself guys

So from these designs voters will determine which one's best

For voters, please introduce yourself

I'm Andri Rahmanto from Computer Science UNJ 2018

I'm Prins Alvino Rolland from Inholland University, Info and Tech 2018

Naufal Pane from Bina Nusantara University, Info and Tech 2018

Thank you voters for the introduction

Next we have design display presentation for GEMAR

The opening of GEMAR is the logo of the sponsor, SPEC

After that there are two main features,

Which is material and arrange sentence

In material there are some categories, ex. body anatomy, fruits, things, etc.

There will be audio played and syllables from the word chosen

From arrange sentence, there will be a set of words where user has to choose to conjure a sentence according to the image displayed

These are the designs we're going to review

Move on to the design we have made

First one is more like the revised version of the app

This is the first design option

The font isn't cursive anymore

The color is changed to blue according to background

And this is the second design option

According to voters, which design option is suitable for user?

This one's Option 1

This one's Option 2

From the original design, the logo's color is orange while the background is blue so we changed the cards into blue however varied with dark blue and soft blue

However for the 2nd design we changed it completely

While the layout is the same

The background has changed, the theme color also

The icon also changed from orange to blue

We also changed the font

The model and color is replaced on the second design while keeping the layout

Until here all is clear, right? The comparison of the designs

Clear

This is the main feature of the app

Option 1 only changed icons color while Option 2 change background and card also images which is more colorful

As a result, more kids-friendly

This is Arrange Sentence feature also the same indifference like before whereas Option 2, the images are more eyecatching and not too monotone

The key difference is in background and color also font while the layout's the same

For voters please give opinion and feedbacks starting from Andri

Which design do you prefer?

For me, because the target is kids, I prefer Option 2

From Agatha yeah?

Yeah

In color, Option 2 will attract more kids

However from the card shape and consistency of design is Option 1 since Option 2 is more complicated

More problem if the words are long

As coloring I prefer the right one

The rest I prefer Option 1

Okay

Thats all from me

Thank you

Next who's going to give their opinion?

For me I prefer Option 1 since it's more easy to read, more organized

In comparison, Option 1 has more clear images for user to see

Since Option 2's image is the same to background, which is good however it doesn't actually tell user which one's to read

But on this menu feature, for kids, Option 2 is clearly more interesting since there are more shapes in every menu

However Option 1 is more organized

Option 1 is more user-friendly, but Option 2 is more interesting

Okay that's all?

Anyone wants to add?

I want to give my opinion but mostly the same as Prins and Andri, so..

From Prins, overall which one do you prefer?

Overall it's Option 1 for me

The color presentation's easy to read and the layout is more easy to use

Okay thank you

From Naufal Pane?

I prefer Option 1 since there are kids who doesn't really like bright colors

For the font too

I prefer seeing Option 1 since it's more interesting and the background fits

That's all

Thankyou

Andri which one do you prefer

For me overall Option 1

Thank you for the voters for sparing their time to give us opinions and feedbacks to the designs we have made from GEMAR app

We wish we can accomplish your feedbacks

Next what?

No doorprizes?

Now we can end this video conference

Thank you for the participation, good night all

Night
