FEEDBACKS FROM VOTERS

Andri Rahmanto

"Because the target is kids, I prefer option 2. In color, option 2 will attract more kids. However from the card shape and consistency of design is option 1 since option 2 is more complicated. More problem if the words are long As coloring I prefer the right one. The rest I prefer Option 1."

Naufal Pane

"I prefer Option 1 since there are kids who doesnt really like bright colors, For the font too. I prefer seeing Option 1 since its more interesting and the background fits. That's all."

Prins Alvino

"For me I prefer Option 1 since it's more easier to read, more organized. In comparison, Option 1 has more clear images for user to see. Since Option 2's image is the same to background, which is good however it doesnt actually tell user which one's to read. But on this menu feature, for kids, Option 2 is clearly more interesting since there are more shapes in every menu. However Option 1 is more organized, Option 1 is more user-friendly, but Option 2 is more interesting."
